Regional Workshop for

YOUNG EARTH SCIENTISTS

On

*Tectonics, Sedimentation and Geo-hazards
with Special Reference to North East India*

November 16-21, 2015

Department of Geology,
Nagaland University, Kohima Campus, Meriema
Kohima – 797004

THE WORKSHOP

North East India is one of the few places where it is possible to analyze both short and long term events of the earth's history, which has not only shaped some of the major features of the earth but also has provided enough natural resources for civilization. The region has always attracted Earth Scientists from various parts of India, and other parts of the globe. It is endowed with numerous natural resources in different geological and tectonic settings. In spite of its natural resources and complicated geological setting, the geology of NE India still remains one of the least explored terrains of India. Being remotely located, recent developments in Geological Sciences are also not being properly disseminated through young professional minds.

In light of the above, the Department of Geology, Nagaland University, Kohima Campus, Meriema plans to organize a Regional Workshop including one day fieldwork for young earth scientists of NE India, which will provide a platform for dissemination of recent developments in Earth Sciences. Resource persons for the workshop will comprise experts in Northeast Indian Geology.

FOCAL THEMES

Sedimentary Basins of NE India

Geodynamics of NE India

Ophiolites

Geohazards

DEPARTMENT OF GEOLOGY

The Department of Geology was established in 1983 under the erstwhile North Eastern Hill University. In 1994 it was merged with the Nagaland University by an Act of Parliament. Since its inception the Geology Department has been imparting courses leading to M.Sc. and Ph.D. degrees in Geology.

Besides teaching, the Department is actively engaged in research related to Geo-Environmental studies, Petrology and Geochemistry, Sedimentology, Economic Geology, Geohazards, etc. A number of projects sponsored by Central funding agencies have been successfully completed by the Department. At present the Department is running a few sponsored research projects supported by various funding agencies. The Department is also supported by the DST, Government of India under its DST-FIST Level-1 program. The Department has also organized some National and Regional seminars and workshops. Faculties of the Department have extended their services as Consultants to various Governmental and Non-Governmental organizations of Nagaland.
