# Introduction

The National Education Policy 2020 is holistic and forward-looking; its substantive impact can only be measured through its effective implementation. The implementation of this comprehensive policy in all states of India is imperative to add to the step of India towards Vikshit Bharat @ 2047. The policy aims to redefine India's educational landscape, embedding within its framework aspirations to foster an educational environment that is innovative, flexible, and multidisciplinary. The National Education Policy, 2020 has conveyed the structural change in the education system which aims to make India the global knowledge superpower ensuring equity and Inclusion. The inclusion involves restructuring the whole system to ensure a wide range of educational opportunities; including curriculum, pedagogy, research, internship and experiential learning. Built on the foundational pillars of Access, Equity, Quality, Affordability and Accountability, the NEP 2020, suggests an inclusive learning outcome-based curriculum.

To strengthen India to move towards Viksit Bharat @2047, we consider it imperative to implement the NEP 2020 in letter and spirit in all the states of India, including the North East Region. In the context of North East India, a region distinguished by its unique societal and geographic characteristics, there is a need for targeted support to facilitate the effective implementation of the National Education Policy (NEP) 2020. The effective implementation of NEP 2020 can ensure that education is inclusive of these cultures, promoting their preservation and integration into the broader educational framework. It can lead to active participation in nation-building, fostering a more inclusive and harmonious society. Thus the proposed two-day seminar on Strategic Implementation of NEP2020 at Higher Education in North-East India will contribute significantly to understanding the gap in policy intent and implementation of NEP 2020 in North East India.
