About The Conference

The International Conference on Medicinal Plants, Biodiversity Conservation, and Natural Products for Health Care Needs in Traditional System of AYUSH Medicine (MBNHA-2025) aims to bring together researchers, practitioners, and industry experts to explore the rich potential of medicinal plants and natural products in healthcare. This conference will serve as a platform to discuss advancements in biodiversity conservation, sustainable utilization of medicinal plant resources, and the role of traditional AYUSH medicine in addressing global health challenges.

About Nagaland University

Nagaland University, is the 13th Central University and the only central university in Nagaland was established based on the act of parliament of India and received assent of the President of India on 20th October 1989 as THE NAGALAND UNIVERSITY ACT 1989(No.35 of 1989). The headquarters of the University i.e Lumami, as per the act could not immediately accommodate the needful so as to start functioning as headquarters. At present the university has three campuses, viz (i) Headquarters at Lumami in Zunheboto district (ii) Kohima campus at Meriema in Kohima district (iii) Medziphema campus (School of Agricultural Sciences) at Medziphema in Dimapur district. The erstwhile temporary campus at Dimapur (School of Engineering and Technology) has been shifted to Kohima in 2024. There are 44 Departments offering Undergraduate, Postgraduate and Ph.D. programmes in different disciplines of Arts, Commerce, Sciences, Agricultural Sciences, Engineering and Technology, and Management Streams. There are 69 colleges from all over the state of Nagaland, currently affiliated to Nagaland University.

About the Department of Forestry

The Department of Forestry was established in 2016 and is presently in its infantile stage. The Department's vision is to provide quality education in Forestry and subsequently create trained manpower for addressing issues related to ethnoforestry, biodiversity, conservation management and Forest produce based value-added products of the state's forest resources, further extension of green cover and judicious, utilization of forest resources and biodiversity for all encompassing benefits to the society's wellbeing and also sustains their bioeconomy.

The Department offers both M.Sc. (intake capacity 17) and Ph.D programmes. The Department continuously updates its PG and PhD syllabi to align with contemporary academic developments. The department houses well equipped Research Laboratories and Faculty Members, Students regularly publish research in reputed journals, with some works also being patented. The Department organizes national seminars, workshops, career counseling sessions, and study tours to provide holistic academic exposure. The Department also aims to impart the best technical knowledge at the post graduate level in order to enable students to face the intellectually demanding and scientifically rigorous needs of the global Forestry sector.
