NAGALAND UNIVERSITY SPONSORED

4-Day Workshop on

DATA ANALYTIC USING
'R' & 'SPSS' METHODS

03rd – 06th October 2018

Organised by

Department of Economics
School of social Sciences
Nagaland University
Hqrs: Lumami-798627
Nagaland, India

The Department of Economics, Nagaland University, Lumami is going to organise four days workshop on Data Analytics using 'R' and SPSS methods for Ph.D. scholars from 03rd to 06th October 2018.

About the Workshop

Though qualitative research methods provide an opportunity for in-depth evaluation of questions that may not be easily answered through analytical methods, quantitative research allows investigators to develop a deeper understanding of a topic using methodologies such as focus groups, in-depth interviews and direct observation to investigate attitudes, beliefs and performances. The workshop is designed to impart knowledge of scientific research, integrate qualitative and quantitative approaches using advanced techniques and to orient the young scholars to train in applications of Statistical Package of Social Sciences (SPSS) and 'R' Analytical Tools across the various fields of Economics, Commerce, Business Management and Statistics.

The aim of this course is to introduce applied statistics such as descriptive statistics, correlations, regression analysis, factor analysis, principal component, and other methods relevant for economics, commerce, management studies and other related subjects. This programme will help the scholars with the concepts and features of data processing and management, applied tools and techniques, data analysis and interpretations in cross section, time series and panel data. This course has been developed for beginners who are currently involved in research and are interested to apply quantitative methods in their area of work.

Objectives of the Workshop

To provide a platform for Doctoral Students in various stages of research to develop theoretical and empirical insight on research methods.

To improve skills using SPSS and R Methods for quantitative data analysis and enable the participants to introduce various methods, techniques of research and apply statistical tools in handling data processing and analysis.

To achieve proficiency with software for analysing quantitative and qualitative data.

Eligibility Criteria

Registered Ph.D. students of any recognized Indian university/research institute in the branch of economics, commerce, management studies and statistics are eligible to apply for the workshop. The candidates with basic knowledge of statistics & computer application will be given preference.

How to Apply

Interested candidates can apply to the Course Director along with the duly filled up registration form on or before 07th September 2018. The candidates are required to send the registration form duly forwarded by the Ph.D. supervisor and head of the department to the email ID of the course director, followed by hard copy of the application.

Registration Fee: Rs.1000/-

***Accommodation if required kindly inform in advance.**
