<p>Justification for Sl.No.4: During pilot sampling, the Doyang River exhibited minimal spatial variation in key physico-chemical parameters and macroinvertebrate assemblages, even under differing human pressures, limiting its suitability for calibrating a multimetric index. In contrast, the Dihing River displayed a clear gradient of human impacts with corresponding changes in physico-chemical parameters and macroinvertebrate communities, providing the necessary variation for metric selection and validation.</p>

AGENDA NO. AC: 43: 14:3	Recommendation of the School Board of Sciences for minor modification in FYUGP in Environmental Science syllabus. Justification: <i>The Department of Environmental Science (EVS) admits PG students from diverse science backgrounds, some of whom may not possess foundational knowledge in Environmental Science. Therefore, it is necessary to provide basic environmental science instruction in the first semester of the PG programme. Currently, the fourth year of the FYUGP course largely replicates the first-year PG curriculum. As EVS undergraduates have already covered these basics, the Department has revised the fourth-year FYUGP syllabus to focus on practical and application-oriented learning</i>

AGENDA NO. AC: 43: 16:8	Recommendation for approval of flexibility in adjustment of M.Sc. Courses of the Two Years and One Year PG Programmes according to the requirements of the Departments under the School of Sciences, NU.																								
	Discussion: Some of the departments under the School of Sciences are of the opinion that if the entire 4 th Semester is allotted with only <i>One Course of Dissertation with 20 Credits</i> , it would entail removal of some important papers from their M.Sc. Course Curriculum. Therefore, some flexibility should be there to include those papers in the 4 th Semester Course Structure along with <i>Dissertation as the major component</i> .
